

KEARNS RUNS MARVELOUS TWO MILE RACE IN 9.28 TO BREAK OLD RECORD

TECHNOLOGY STAR RANKS WITH GREAT DISTANCE RUNNERS

His Two-Mile Run Is Second Best
Time In United States
This Year

BELL SETS "220" RECORD

Jack Kearns '32, veteran Technology track star, ran a sensational two-mile race at the Greater Boston Intercollegiate track meet last Saturday in 9 minutes and 28 seconds, to break a seventeen-year-old Institute record with the second fastest two-mile run in the United States this year. His phenomenal performance, which came within 6 seconds of breaking the ICA record, ranks him among the country's greatest distance runners.

Dick Bell made a new Institute record in the "220" with the fast time of 21 4-5 seconds. He broke one of the oldest Institute track records which was made by Carl Gram in 1909. Bell also won the 100-yard dash with little difficulty. The track was soft from Friday's rain, which makes Bell's feat all the more remarkable. Lou Holladay was another Engineer to place in the dashes. After winning his trial heats he breezed through to take third in the "100" and fourth in the "220." Both he and Bell equalled the Institute record of 10 1-5 seconds in the century.

The team scored six first places and placed in nearly every other event. Boston College, however, won the meet with 73 1-2 points. Northeastern was second with 68 points, and Technology ranked third with a total of 59 1-2 points. Harvard was fourth with 24 points.

Mann Finishes Second

In the mile run Bob Mann ran a fine race to finish second to Moynahan of Boston College. Moynahan made a new meet record and Mann also broke the old record. Mann caught the Boston College runner on the last lap but was not quite strong enough to pass him.

In the "440" Captain Jewett led the field until the final stretch. He took fourth in a close race. Goochy Smith qualified for the final of the "880" and then took sixth in a very fast field. Rimbach, Ball, and Dahl Hanson all placed.

Pierce Springs Surprise

Jack Robertson led the field in the javelin, making a meet record with a throw of 190.9 feet. Edgar Pierce sprung a surprise by winning the pole-vault. Nat Green tied for second in this event although he had to quit when he injured his leg. Walt Wrigley took second in the broad jump with a leap of over 22 feet, Falt of Northeastern being the only man to outjump him. Everett Coon was the other Institute man to take a first place. He cleared 6 feet to win the high jump. Walker and Pierce tied for fourth in this event.

In the freshman meet, Dixon won the javelin and took third in the pole-vault. Horton took third in a fast quarter-mile, and Chalmers copped third in the mile.

ELECT OFFICERS AT STYLUS BANQUET

Officers for the coming year were elected at the annual banquet of Stylus, THE TECH honorary society, held last Saturday evening. The new men of the Society presented an entertainment based on situations in an imaginary "TIM" college in Idaho, following the dinner.

The new officers elected were as follows: Dean S. Dadakis '34, president; Walter L. Wise '34, vice-president, and Norman B. Krim '34, secretary-treasurer.

Seniors Vote On Laziest Man Among Other Things

A poll among members of the Senior Class to determine such questions as to who is the best dancer, who is the best-dressed, who is the laziest, who is most likely to succeed, and so on, is being held. The ballots are available in the Information Office, and all Seniors are urged to vote.

The winners in the twenty-five different categories will be announced as part of the Class Day exercises, and the ballot box is open until that day. Many men have already cast their ballots.

Professor Dana of Harvard Will Speak On Shaw

"With Shaw In Moscow" Is Title
Of Address To Be Presented
Before Liberal Club

"With Shaw in Moscow" is the title of a lecture that will be given by Professor H. W. L. Dana under the auspices of the Liberal Club, in Room 2-190, Thursday afternoon at 4 o'clock. Although a partial account of the material in the lecture has been contributed to the *American Mercury*, its full contents has never before been made public.

Professor Dana, after receiving the degree of Doctor of Philosophy from Harvard University, taught at the University of Paris, and at Columbia University, where he was Assistant Professor of Comparative Literature. In recent years he has made a special study of Contemporary European Drama, and in 1930 was one of the founders of the Cambridge School of the Drama. In 1927 and 1928 Dr. Dana spent twelve months in Moscow studying the Soviet Theater, and last year he returned to Moscow for six months.

Dr. Dana accompanied Bernard Shaw during his much-discussed visit to the Soviet Union last year. This visit inspired Shaw's latest satirical Movietone talk. In the lecture, the whole question of Shaw's conversion to Communism will be discussed, and after the lecture there will be an opportunity for questions and general discussion.

CATHOLIC CLUB WILL ELECT NEW OFFICERS

Polls For Members Will Be Open
All Day Tomorrow

Elections of officers in the Technology Catholic Club for the year 1932-33 will be held in the Main Lobby tomorrow from 9 to 5 o'clock. The following men have been nominated:

President: L. deGiv'e '33, L. F. Donahue '33; Vice-President: J. A. Hayes '33, W. D. Murphy '33, R. J. Theriault '33; Corresponding Secretary: H. W. Eagan '34, George Sweeney '34; Treasurer: Francis E. Doyle '33, C. M. Parker '34; Recording Secretary: R. E. Shea '33, O. L. Thompson, Jr. '34; Senior Director: C. A. Allen '33, A. T. Bishop '33; Junior Director: W. Brockman '34, J. J. Carey '34; Sophomore Director: J. A. Burns '35, C. E. Bond '35.

The Club closed its season last Friday with a very successful summer formal dance, held jointly with the Harvard Catholic Club in the Main Hall of Walker Memorial. Music was furnished by Ranny Weeks and Sammy Liner.

FELLOWSHIPS GIVEN TO SIX INSTITUTE RESEARCH WORKERS

Textile Foundation Awards Will
Enable Winners To
Continue Work

ONLY 20 PRIZES AVAILABLE

Six of the twenty research fellowships recently awarded by the Textile Foundation were given to men connected with the Massachusetts Institute of Technology. They are John B. Calkin, Cambridge; Bernard S. Gould, Boston; G. Gordon Osborne, Cambridge; Orrin W. Pineo, Milo, Me.; Bryce Prindle, Barrington, R. I.; and R. L. Steinberger, Westwood.

Calkin, a graduate student in Applied Chemistry at the Institute, will spend the coming year at Cornell University. He will investigate the absorption and adsorption of solutions by textile materials, under the direction of Dr. Wilder D. Bancroft.

Studies in London

Gould, a Senior at Technology, was awarded a junior fellowship entitling him to a year's study in London. Osborne, a student in the Harvard School of Business Administration, will carry on work at the Institute on micro-analysis of fibers, under Professor E. R. Schwarz.

Pineo plans to carry on research in the spectrophotometric analysis of dyed materials, in the Technology Laboratory for Color Measurements. He is at present a graduate student in Physics, and will conduct his work under Professor Arthur C. Hardy of that department.

Prindle will continue research in the department of Biology and Public Health as a junior fellow. Under the supervision of Dr. Samuel C. Prescott, Dean of Science, he will work on problems of microbiology of textile fibers.

Steinberger will continue his investigations on the elastic and plastic properties of textiles at Harvard University, under the guidance of Dr. P. W. Bridgman. He will work in cooperation with the Textile Research Laboratory at Technology, and in consultation with Professor Schwarz.

PRINCETON CREWS WIN FOUR RACES

Engineers Trail Powerful Tiger
Eights In Regatta On
Lake Carnegie

Four Princeton crews triumphed on Lake Carnegie Saturday to make a clean sweep of the Technology-Princeton regatta. The Tiger varsity, Jayvee, 150-pound, and freshman eights coasted home with comfortable margins to triumph over the Engineer boats. The varsity led by four and one-half lengths at the finish, the Jayvees by six, the lightweights by two and one-half lengths over the Henley distance, and the freshmen sailed home four lengths in front of the Technology outfit.

During the starting sprint both varsity boats kept on even terms, but the Princeton shell slowly forged ahead as both boats dropped to a more steady pace. At the quarter-mile mark the Tiger shell had pulled into a lead of about a length, and at the mile post they had picked up nearly three lengths. Coming into the mile and one-half mark with another half length to their credit, the Princeton boat continued to move away, and added another length as the finish line was reached.

Jayvees Lose By Six Lengths

In the Junior Varsity encounter, Princeton jumped into the lead at the start and pulled out ahead by five lengths. Toward the finish of the race they picked up the stroke and crossed six lengths to the good. In the 150-pound race over the Henley distance, the Engineer lightweights put up a stiff battle before being headed.

Four lengths turned out to be the winning margin in the freshman encounter over a mile and three quarters course.

INSTITUTE MAKES CHANGE IN ADMISSION STANDARDS TO TAKE EFFECT IN 1933

Fifty Cents Must Be Paid For Dorm Riot (So Called)

A bill for fifty cents, accompanied by a terse note from Bursar Ford, today greeted those residents of the Dormitories who failed to return to the Dormitory Committee a previous note concerning the "riot."

Following is the text of the Bursar's note:
"By vote of the Dormitory Committee on May 2, the Dormitory Board is requested to collect an assessment of 50 cents from 196 men who have failed to make answer of any kind to a request of the Dormitory Committee to pay such assessment, or to state on honor that they were not present and took no part in the recent Dormitory Riot (so called)."

"As your name appears on their list, you are requested to present the enclosed bill at the Cashier's Office, Room 10-180, and pay this amount on or before Monday, May 16, at 2 o'clock. For failure to pay such before the date and hour specified, a collection charge of 100 per cent will be added."
(Signed) HORACE S. FORD,
Bursar.

Changes In Cover Design Features 1932 Technique

Individual Pictures Replace Group Photographs In Faculty Section

Simplicity is the keynote of the 1932 *Technique* which will make its appearance sometime next week.

Instead of the artificial leather of former years, the cover is of fine cloth in taupe color, something which has never been presented before in a yearbook. The design was adapted from that of an expensive edition of a rare English book, and the publishers claim to have never seen anything like it before.

All members of the Faculty now have their individual pictures, and the group photographs that have long made the Faculty section an eyesore have been done away with. Eight views of Boston and vicinity, as well as four snow scenes of the Institute, add to the pictorial attractiveness of the volume.

Special Feature

As a special feature, a biography of Dr. Stratton has been written, and with it are printed some hitherto unpublished pictures of the former president.

The informals have been arranged in an entirely new manner and titles have been affixed to each to add interest to the individual pictures.

NEW INTEREST SHOWN IN SPEAKING CONTEST

Judges Will Add Third Tryout
For New Entrants

Because of a sudden increase in student interest, a third meeting of the semi-finals for the Stratton Prize will be held next Thursday afternoon at 4 o'clock in Room 4-270. All those interested in getting into the contest should get in touch with either Professors Samuel C. Prescott or William H. Timbie immediately.

Two of the semi-final sessions have already been held and the judges have consented to sit for another afternoon. The finals will be held during Senior Week. Six of the papers that have been given during the present eliminations will be presented at that time.

WILL NOT REQUIRE COLLEGE BOARDS UNDER NEW PLAN

Limited Number of Students with
High Standards Admitted
Without Examinations

ACCEPT N. Y. REGENTS

An alternative method of admission to the Institute for students from accredited preparatory and high schools was announced today. These changes include admission without examination of students who have been in the upper fifth of their class for the last two years of school, and acceptance of the New York State Regents examinations with high standing.

In announcing this alternative method of admission, Professor James L. Tryon, Director of Admissions, said: "The Institute has always maintained that the thorough training in English, History, languages, Mathematics, and Science given in the better class of high and preparatory schools is the best preparation for its courses. A recent study of the records obtained in the Institute by men trained in such schools shows that the majority of those who rank in the upper fifth of their classes have done exceedingly well in their studies at Technology."

"In order to give recognition to such systematic and thorough preparation, Technology will try the experiment of admitting without examinations those applicants who submit satisfactory evidence of having completed their fundamental training with high standing. Beginning in September 1933, the Institute will admit a limited number of students without examinations. A small trial group will be admitted by this method next September.

Encourage Students of Promise

"The Institute desires to encourage those students whose qualities of character and intellect indicate their adaptability to an academic environment and who show promise of development into useful and forceful citizens."

In addition to maintaining a standing within the upper fifth of his class for the last two years of his preparatory work, the student seeking admission without examinations must have completed the program of subjects required by the Institute. It will also be necessary to present letters of recommendation from the principal and from two persons who are not relatives vouching for his personal qualifications and ability.

To Have Own Examinations

In accepting the New York State Regents examinations, the Institute will require a record of 80 per cent. Technology will continue to admit students, as in the past, by its own examinations, which are held in September, or by the College Entrance Examination Board examinations, held in June.

VI-A DANCE OPEN TO ALL STUDENTS

Course VI-A's annual dance will take place next Saturday night, May 14, from 8 o'clock to midnight in the North Hall of Walker Memorial. Jimmy Gahan's "Utopians" will furnish music for the affair.

The dance is not limited to Course VI-A men, and is usually well attended by the student body. It is formal, and tickets may be obtained in Room 4-203, at \$2.00 a couple. The ticket includes refreshments which will be served during the evening.

JUST DISGUST

TO young men seeking training for engineering which in itself requires accurate and efficient work, the actions of the present Congress must be especially distasteful. For literally months, this body has been in session, and as the heat of summer and the time for national conventions draw near, small-time politics occupy the business hours of our representatives. While matters of national importance hang in the balance, the interests of small constituencies are advanced and beaten back. The viewpoint of the Congress has been decidedly local, to the detriment of the nation as a whole. Inefficiency in dealing with nation-wide questions has been rampant.

The recent step of President Hoover in reprimanding the Congress for its lack of activity in settling matters of a national nature meets with the approval of the people who now realize how little has been done. Without a doubt he is supported in his call for action; and young engineers, if we may refer to students as such, are among his staunchest supporters. The previous actions of Congress have filled us with utter and justified disgust; we can only hope that what has been started will continue through the remainder of the session.

THE NEW ENTRANCE

ENTRANCE examinations seemed to be one of the items of a college education which had to be endured. At least that was the case if a man wished to enter the Institute before this year. Up until this time it has been necessary for a prospective student to take either the College Board Examinations or the regular fall Institute examinations; there was no way to avoid them.

Technology has long had a reputation for being a school of rigid entrance requirements and strenuous curricula, but a survey of Institute marks and secondary-school records revealed the remarkable correlation which results in the announcement of today. The step taken in permitting men in the upper fifth of their classes to enter without examinations will doubtless meet with the approval of almost everyone — students, Faculty, and especially, the prospective Technology man.

UNAPPRECIATED SERVICE

THERE is no gain without some loss. It is to the unfortunate death of Richard M. Homberg '23, that Technology owes the existence of the Homberg Infirmary, one of the most valuable aids to the well-being of the student body that the Institute affords. The memorial to his name was erected from funds furnished partly by his family, partly by Technology, and filled a long-felt want.

The Infirmary is primarily intended to minister to the needs of those members of the student body, Faculty, and employees, who are not sick enough to be admitted to a hospital, yet too sick to remain in their rooms without attention. A constant stream of colds, boils, and minor ills is always arising, cases which when treated promptly cause no further trouble, but which can easily develop serious complications. There is no way to tell how many deaths from complications have been prevented by a few days of supervised rest in the Homberg Infirmary.

One marked result of the creation of the Infirmary has been a virtual stamping-out of contagious diseases among members of the Institute. At the first sign of such a disease in a person admitted for treatment, the case is immediately isolated and put under observation until it is definitely ascertained whether the person has the disease or not. Previous to the erection of the Infirmary, lack of the proper facilities prevented such a course.

An indication of the service the Infirmary renders to the student body is furnished by the following figures. In the first year of its existence it had some 19,000 patients; in the year 1930-31, it had 28,119 patients. Many parents, on visiting the Infirmary, have been influenced to have Technology, in preference to some other school, simply because of the medical facilities available here.

MAY ISSUE T. E. N. OUT TOMMOROW

Professor Frederick K. Morris contributes his last in a series of three articles on the "Beginnings of Life on the Earth," in the May issue of *The Tech Engineering News* which will be placed on sale tomorrow morning. There are many interesting and instructive articles in the new number.

As We See the MOVIES

R.K.O.-KEITH'S
"Night World"

Featured on the screen of R.K.O.-Keith's this week is another picture showing the time-worn and haggard story of the night club. This reviewer had thought that night club life was already nothing more than a reminder of the pre-depression days, but evidently the producers of the picture didn't think so.

Playing the main roles in this story of sham gaiety and intimate details of the night-club racket, are Boris Karloff, Mae Clarke, and Lew Ayres. The whole action of the story takes place in a single night and is not worth the trouble of describing its threadbare complexities.

I. S. B.

METROPOLITAN
"Sky Bride"

A time-honored plot and worn-out ideas, but great flying and plenty of thrills; that is what this week's picture at the Metropolitan contains. Plot: heroic stunt flyer cracks up friend, turns yellow, and then snaps out of his cowardice in time to save child from dire death, thus redeeming himself.

Only two crack-ups are featured in the picture, but each one of them is worth while seeing; the rescue of the child is almost hair-raising. A small cast, but it includes Jack Oakie and Richard Arlen.

The stage review, "Slavique," has a well-trained set of dancers, besides a fair acrobatic exhibition; Bing Crosby knocks away several notions about crooners by being very pleasant to listen to; Ranny Weeks and Sevitzyky play "Faust" up pretty well; and Martel is as bad as ever.

As We Like It

WILBUR
"The Chocolate Soldier"

Vivienne Segal and Charles Purcell in "The Chocolate Soldier," a light opera in three acts; music by Oscar Straus.

Light operas like "The Chocolate Soldier" are not written nowadays very often; indeed, light opera is almost never written at all any more. The fashion has shifted to musical comedies and revues, which have little plot and continuity, and no sustained music. In last night's production, the music is not only sustained, but is consistently tuneful. The high spot is, of course, the "My Hero" number at the very beginning; but there are no melodic low spots. It is a continuous musical composition, and not a miscellaneous collection of experimental discords.

So much for the opera itself; its merits have been generally recognized for a number of years. A good many revivals are distinctly disappointing; the producers skimp and economize on so many items that the whole production looks shoddy. That is in general not true in this case, although the men's uniforms might have been better chosen. The ladies' costumes were new, and the scenery and ensemble were satisfactory.

Eminently satisfactory also were the principals. Miss Segal and Mr. Purcell are known on Broadway, and are of the first rank of musical show performers. Mr. Purcell was in excellent voice, but Miss Segal had some trouble; she had to work rather hard for the high notes. Both turned in excellent performances.

Messrs. Mulcahy, Dunsmore and Rogers did first-class work, though some might think some of the comedy overdone; the female supporting cast left little to be desired. We wonder how soon it will take the producers to learn that a revival of a good show, well produced, will always fill the house; we see only too few of them.

NOTICE

All Crew Members, Supervisors, Team Captains and Student subscription salespeople who wish to avail themselves of the opportunity for free scholarships made possible through the courtesy of the Leading Magazine Publishers again this year are requested to apply to the national organizer M. Anthony Steele, Jr., Box 343, San Juan, Porto Rico, stating qualifications fully.

Here, MEN, smoke a man's smoke

A PIPEFUL of good tobacco is distinctly a man's smoke. The women (long may they wave!) have taken over most of our masculine privileges. But pipe smoking still belongs to us.

In every walk of life you'll find that the men at the top are pipe smokers. And most college men agree that the pipe offers the rarest pleasures a man could ask of his smoking.

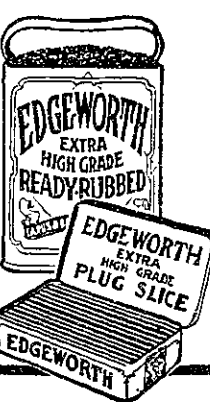

When you smoke a pipe, be sure you choose the tobacco that will give you the greatest enjoyment. In 42 out of 54 colleges Edgeworth is the favorite. You can buy Edgeworth wherever good tobacco is sold. Or for a special sample packet, write to Larus & Bro. Co., 105 S. 22d St., Richmond, Va. Sample is free.

EDGEWORTH
SMOKING TOBACCO

Edgeworth is a blend of fine old burleys, with its natural savor enhanced by Edgeworth's distinctive and exclusive eleventh process. Buy Edgeworth anywhere in two forms — Edgeworth Ready-Rubbed and Edgeworth Plug Slice. All sizes, 15¢ pocket package to \$1.50 pound humidor tin.

Here is a Choice in Suits

\$25

"Legion" Worsteds, well known for full value in the lower priced suits — choice of patterns and models — 3 pieces.

\$30

Suits by Smitherson—3 piece worsteds in many patterns or the 4 piece "Town and Country". Always value plus with Smitherson.

\$50

Rather dignified this Hickey Freeman business model—places a man at once in the well dressed class — 3 pieces.

\$35

At this price we recommend the Mt. Rock Worsteds. A fine fabric, finely tailored in 4 pieces. Real Value.

Your Technology Charge Account is good you get a dividend too.

LACROSSE MEN WIN FROM B. U. 5 TO 1

Technology's varsity lacrosse team broke its jinx last Wednesday afternoon and defeated Boston University 5 goals to 1 on the loser's field. Saturday afternoon the creasemen played an equally impressive game against the strong Boston Lacrosse Club, but lost an early lead for a 5-4 defeat. Their season's record is now one victory in eight games, with one contest still to play.

Last Wednesday's victory over Boston University showed a marked improvement in the Engineers' play. Safford led the play, scoring two goals. The game on Saturday was much more exciting. The Beavers led for more than half the contest, but were unable to hold their advantage.

One more game remains on the schedule, with Dartmouth this Saturday. Although the Hanoverites are reputed to have a powerful twelve, the Engineers will give them an interesting tussle if they continue the brand of play they have shown in the last few games. The freshman team, which lost its first start 16 to 0, plays the Tufts yearlings tomorrow afternoon at Medford.

ALLIGATORS TAKE FIRST GAME, 6-4

Defeat B. U. Jayvees Although Outhit; Hall Pitches Clever Game

Playing a smart game afield and proving effective at bat, the Alligators, Technology's unofficial baseball representatives, scored their first victory of the season last Saturday at Coop Field, defeating the Boston University junior varsity nine by a 6-4 count. In the fourth inning, with the score 3-0 against them, the Alligators staged a four-run rally to assume a lead that they held till the end.

Lefty Hall, on the mound for the winners, was hit rather freely, being touched for 17 blows, but he tightened up with men on the bases, so that the Terrier second-stringers were never able to score more than one run an inning. He passed two men and struck out seven.

Dick Smith was the team's leading batter, collecting three safeties. Although outhit by the losers, 17 to 14, the Alligators were able to deliver in the pinches, and far outplayed their rivals in the field, making only one error to their opponents' five.

No definite date has been decided upon

for the next game. The summary of Saturday's game:

Alligators						B. U. J. V.					
	ab	h	po	a		ab	h	po	a

Missouri

A fraternity at the University of Missouri pledged forty-two men at a smoker recently, but they neglected to take their names. Now they have entered a cry for help in the lost and found columns of their school paper.

Swarthmore

A survey at Swarthmore college shows that where families have felt the financial pinch, some have continued their sons at college and have kept their daughters at home.

MENORAH SOCIETY TO ELECT NEW OFFICERS

Annual elections of the M.I.T. Menorah Society will be held on Thursday, May 12, in Room 10-267, at 5.15 o'clock.

This will be the final meeting of the Society this year and will be the end of a very successful season of activities. The most outstanding affair to be held by the Society in the past few years was a dance at Walker Memorial which was very successful. Other activities included a smoker and joint meetings with Simmons College and Emerson, which were both very well attended.

MASQUE

An important meeting of Masque will be held in the West Lounge of Walker Memorial tomorrow afternoon, at 5 o'clock. All members are urged to be present. New members will be elected.

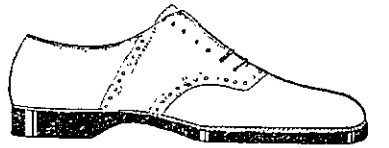

INTERCLASS TRACK MEET

Because of examinations, the date of the Spring Interclass track meet has been changed from May 28 to the afternoons of May 24 and 25. On both days the field events will take place at 4 o'clock and the running events at 5 o'clock. The second afternoon, May 25, will be featured by both the Interfraternity and Dormitory-Fraternity relays.

OFFICIAL BULLETINS OF GENERAL INTEREST

Physics and Physical Chemistry

Harvard University and
Massachusetts Institute of Technology

Monday, May 9, 4.45 p.m., Cruft Lecture Room, Harvard University
Physical Colloquium. "The Stability Range of the Crystalline State." Professor F. Simon, Institute of Physical Chemistry, Technische Hochschule, Breslau.
Tea served at 4.15 o'clock in Library of New Physics Building.

Tuesday, May 10, 4.45 p.m., Cruft Lecture Room
Lecture — "The Possibilities of Approaching Absolute Zero." Professor F. Simon.

Wednesday, May 11, 4.00 p.m., Room 4-270
Lecture under the auspices of the department of Mathematics. "Connections Between Differential Equations and the Calculus of Probability." Professor R. Courant.

Thursday, May 12, 3.00 p.m., New Lecture Hall,
George Eastman Research Laboratory
Seminar, directed by Professor Linus Pauling: "Slater's Method of Formulating Wave Functions for Molecules."

4.00 p.m. Tea will be served in the Emma Rogers Room, 10-300.

Thursday, May 12, 4.30 p.m., New Lecture Hall
Physical Colloquium. "Electrostatic Methods of Producing High Energy Radiations." Dr. R. J. Van de Graaff.

C·A·L·E·N·D·A·R

Tuesday, May 10

5.30 p.m. — Alpha Phi Delta Meeting, Faculty Dining Room of Walker Memorial.
6.30 p.m. — A.S.M.E. Dinner, North Hall of Walker Memorial.

Wednesday, May 11

6.00 p.m. — Tech Catholic Club Dinner in North Hall of Walker Memorial.
7.30 p.m. — Alpha Chi Sigma Smoker, Faculty Dining Room of Walker Memorial.

Thursday, May 12

12.00 m. — Faculty Club Luncheon in North Hall of Walker Memorial.
5.00 p.m. — Meeting of the Radio Society, Room 10-275.

TWENTY-NINE ARE AWARDED LETTERS

Three straight "T's," twenty-one minor letters, and five class numerals were awarded by the Athletic Association at the last meeting. The winners of the straight "T," the highest sports award, are Captain R. W. Hamilton '32, for his work on the varsity fencing team, and C. L. Wilson '32 and H. L. Moore '32 for their work in the Athletic Association.

Following are the minor letter awards:
Squash — sTr — L. DeGive '33, J. J. McHugh '33, E. P. Newman '32, D. Ingalls '34, and G. J. Murphy '32.

Fencing — fTt — Captain R. W. Hamilton '32, M. G. Fra Giacomo '32, V. C. Frisby '33, and D. E. Wells '34.

Wrestling — wTt — R. M. Emery '34, R. P. Ripin '33, E. Shea '33, F. Poole '34, J. J. Klein '33, and G. F. Koller '33. Also discretionary wTt to P. J. Negus '32 and E. J. Isbister '34.

Managers who received letters were J. D. Rumsey '33, basketball; E. L. Wemple '33, swimming; R. S. Morse '33, cross-country; and C. L. Wilson '32, lacrosse.

R. H. Spaulding, J. R. Burton, Jr., W. G. Yepsen, E. B. Reilly, and F. R. White, all of the Class of 1935, were awarded their class numerals for their work on the freshman squash team.

TECHNOLOGY MEN TO BE DELEGATES

In accordance with its usual custom, the T.C.A. will send as many students as possible to attend the annual gathering of the New England Student Conference, held this year at Deerfield, Mass.

From June 13 to June 21, the Conference will discuss religion as it applies to the college student, each group being under the direction of noted leaders in the field. The scene of the gathering is at the Eaglebrook School, where there is ample opportunity for athletic recreation.

There will be two main addresses each day; one in the morning, the other at night. Much emphasis will be laid upon the reconciliation of our religion of today with the apparently conflicting theories which have proved such stumbling blocks to many students.

In an effort to send to the Conference some fraternity men to represent that important faction in Institute life, the T.C.A. will send a circular letter to all the Technology fraternities to find out whether any of their men are interested in the project.

Infirmary List

DO YOU INHALE?

Why are
other cigarettes
silent on this
vital question?

Do you inhale? Seven out of ten people *know* they do. The other three inhale without realizing it. *Every* smoker breathes in some part of the smoke he or she draws out of a cigarette.

Do you inhale? Lucky Strike *has dared* to raise this vital question . . . because certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!

Do you inhale? Remember — more than 20,000 physicians, after Luckies had been furnished them for tests, *basing their opinions on their smoking experience*, stated that Luckies are less irritating to the throat than other cigarettes.

Do you inhale? *Of course you do!* So be careful. Safeguard your delicate membranes!

"It's toasted"
Your Throat Protection — against irritation — against cough
